

CertOn has been developed for businesses and organisations implementing quality assurance and environmental management systems (EMS). It is a web-based tool which provides a single, secure place for managing information and documents associated with your system.

Authorised personnel can easily edit, add or discuss content and upload records and monitoring information such as photos. With approval, auditors or consultants can remotely access your system, review your records and provide comments online.

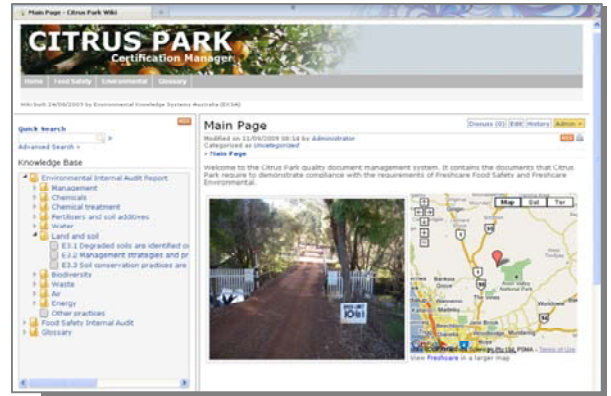

## Features

- Internet based
- Customised design and content
- Information structured and organised
- Login and password protected
- Add, edit and discuss content
- Control who can view or edit individual pages and records
- Print each page with a professional header or banner
