

Show-off your area's valuable heritage to anyone, anywhere, anytime with ShowOn.

ShowOn has been developed by EKSA to enable organisations to easily collect, organise and then showcase the natural, indigenous or cultural heritage of their area using the internet.

Local residents, teachers, and students (and even you) will be amazed to discover the rich heritage of their area. Potential visitors will be easily able to find out what makes your area so special.

They will be able to access local heritage information from a specially designed website and print out maps and information sheets on places, features, plants and animals. They can take these out on-site or, if they have a Smartphone (e.g. iPhone), they will be able to access information while they are there.

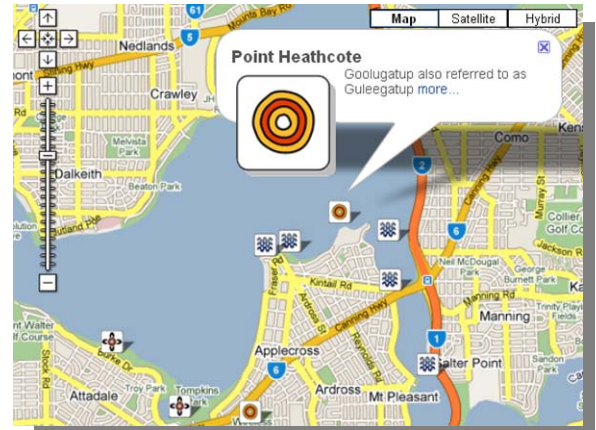

Features

- Custom designed website and Smartphone friendly website
- Google map showing the location of heritage places as well as online trails and tours
- Specially designed symbols highlighting the significance of places
- Dedicated information pages for places and features including plant and animal species
- Content of pages can include site map, interpretative text and resources such as photos, videos, audio files and maps

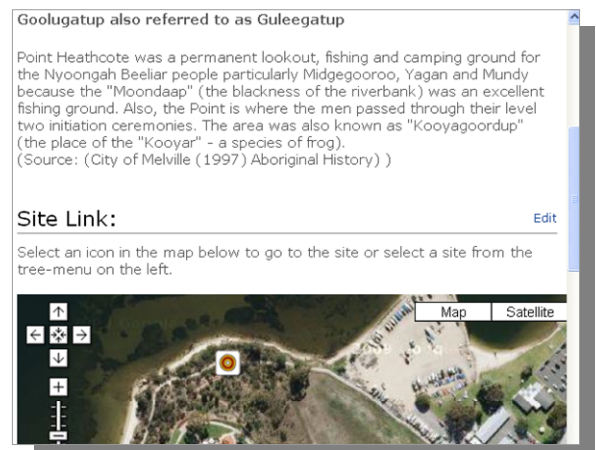

Benefits

- Information accessible anytime, from anywhere by anyone
- Customised design and attractive presentation
- Hassle free development process with guaranteed quality product
- Secure long term storage and maintenance of your valuable information
- Experienced, reliable service and ongoing support
- Able to integrate with existing website

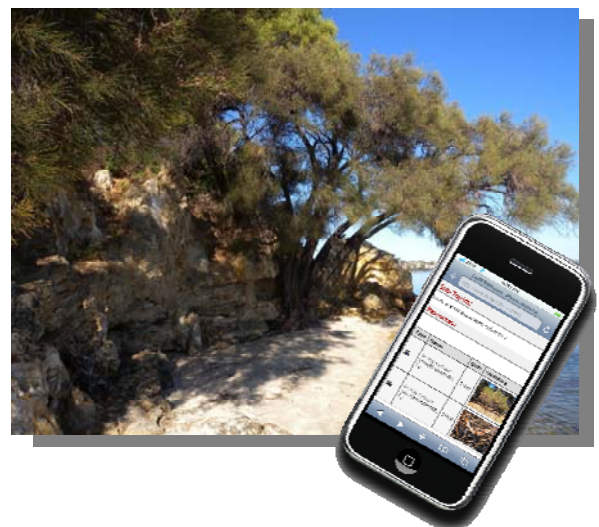

Google map of places and trails

Information on places & features

Photos, videos, audio files & other resources can be linked
